Mohaddese Naghavi

Programmer and web designer with almost 6 years of specialized work experience according to the needs of the collection. High energy and spirit of teamwork and individual work.

Interested in learning and solving new challenges. Ability to do projects as a team or individually. Ability to manage project execution. Being flexible. The ability to understand the problem and analyze and provide a solution to the best of one's ability. I don't care about the language any more, the programming logic and ability to learn makes me learn any programming language with less challenge and have an output from it.

Areas of Expertise

Proficient in HTML, CSS, and JavaScript, and experienced in using front-end frameworks, libraries, and tools

Extensive experience with React and/or Vue for building dynamic and interactive user interfaces

Strong understanding of component-based architecture and state management in React and/or Vue

Experienced in creating responsive and mobile-friendly web designs using CSS preprocessors and front-end framework

Extensive experience working with PHP and Laravel/Codeigniter to create dynamic sites with SQL and NoSQL databases in various fields of shopping, training, customer management, etc.

Strong understanding of component-based architecture and state management in PHP, MVC and NodeJS

Familiarity with version control systems such as Git and experience working in collaborative environments using tools like GitHub or GitLab

Skilled in teaching and presenting technical concepts to clients, team members, and interns in a clear and concise manner

Highly adaptable and flexible, able to handle changing priorities, timelines, and requirements in a fast-paced work environment

Strong problem-solving and critical-thinking skills, allowing me to identify and troubleshoot technical issues quickly and efficiently

EXPERIENCE

Head of the product group—*Alborz Afraz Tabaristan*

Mar 2021 - Present (2 year +)

I did the executive management of the product team consisting of 3 to 5 people We were investigating and solving the challenges and problems we had for product production from a technical point of view, analysis and implementation It was the continuation of the previous path and during this period we focused more on CRM and online store and added a new CMS product to the collection of products. The management challenges that I had more or less experienced in my previous position were a new field for me. I feel that I was able to meet the needs of the collection to an acceptable extent.

PHP Senior Programmer—*Alborz Afraz Tabaristan*

Aug 2019 - Mar 2021 (1 year 8 months)

Payment aggregator system, online school system, profile creation system, store checkout system, online store system and customer relationship system (CRM) I was also active in the field of front and wherever a new design was needed in the system, I did it. During this time, I experienced being a mid level full stack.

Web Programmer—*Alborz Afraz Tabaristan*

April 2018 - Aug 2019 (1 year 5 months)

Experience working with big data and how to analyze databases and deserts During this time, I was recruited as a programmer for the collection and front-end and back-end works I used to do it on some of the government systems of the collection, which was in the form of a product and with an organization I worked with government contracts.
