github.com/mnghv (+98) 919 745 4812

Versatile Senior Frontend Developer with almost 7 years of specialized experience in creating dynamic, responsive, and scalable web applications. Expert in React and frontend frameworks, with a deep understanding of modern web technologies. Proficient in optimizing UI/UX, enhancing performance, and delivering projects with speed and precision. Highly adaptable, eager to learn new tools, and excels in fast-paced environments.

Areas of Expertise

• **Frontend Technologies:** Expert in **HTML, CSS, JavaScript**, with advanced knowledge of frameworks and libraries such as **React** and **Next.js**.

• **UI/UX Design:** Strong skills in building interactive, responsive, and accessible user interfaces with **CSS preprocessors** (SCSS, LESS), **Tailwind CSS**, and **Bootstrap**.

• **Frontend Optimization:** Experience in optimizing page load times, performance, and enhancing user experience through **best practices** in frontend development.

• **Version Control & Collaboration:** Proficient with **Git**, **GitHub**, and **GitLab**, experienced in collaborative workflows.

• **Testing & Debugging:** Hands-on experience with browser debugging, testing tools, and implementing **unit testing** for frontend components.

• **State Management:** In-depth knowledge of **state management** techniques in React using **Redux** and **Context API**.

• **API Integration:** Skilled in consuming and integrating **RESTful APIs** and **GraphQL** into frontend applications.

SKILLS

Frontend Development: HTML5, CSS3, JavaScript, SCSS, LESS, React, Vue.js, Bootstrap, Tailwind CSS, Next.js, Redux, Context API, Fetch API, AJAX, Axios

Frontend Tools: Figma, Sketch, Chrome DevTools, Webpack, Babel

Testing & Performance: Jest, React Testing Library, Lighthouse

Version Control: Git, GitHub, GitLab

APIs: REST, GraphQL,TRPC

Optimization: Code splitting, lazy loading, accessibility (WCAG), SEO-friendly development.

SOFT SKILLS

Strong problem-solving skills, communication, adaptability, team leadership, attention to detail

EXPERIENCE

Senior Frontend Developer (Freelancer) *June 2025 – Present*
Returned to freelancing, offering full-cycle frontend development services for diverse types of projects.
Working with modern technologies such as React, Next.js, Tailwind CSS, and HeroUI, delivering performant and elegant user interfaces tailored to client needs across various domains.

Senior Frontend Developer (German Client) *June 2024 – June 2025*
Worked as a Senior Frontend Developer in a company acting as an intermediary for a German construction firm.
Led the development of a comprehensive project and personnel management dashboard tailored for construction projects. This platform handled all administrative, HR, legal, financial tracking, and profit/loss analysis tasks related to ongoing projects.
Utilized Next.js and HeroUI to build a scalable and modern frontend architecture.
Resolved a high percentage of system and business challenges by actively collaborating with cross-functional teams and improving the user experience and performance.

Senior Frontend developer (freelancer) *Mar 2023 – June 2024*
Led the development of several frontend projects, including e-commerce and portfolio websites for clients globally. Used React and Next.js to create modular, maintainable components.Collaborated closely with designers and backend developers to deliver smooth, responsive, and user-friendly web experiences. Implemented modern CSS techniques (Tailwind, SCSS) to ensure consistency across devices.

Senior Frontend developer (Dornica) *Mar 2021 - Mar 2023 (2 year +)*
Managed a team of frontend developers, driving the development of user interfaces for CRM and online store systems. Led the implementation of modern frontend architectures using React and component-based development. Focused on improving UI/UX and ensuring seamless integration with backend services using API consumption. Developed reusable components and optimized frontend performance, reducing load times by 30%

Frontend developer (Dornica) *Aug 2019 - Mar 2021 (1 year 8 months)*
Created responsive and mobile-friendly UI for online payment systems, profile management, and customer relationship systems. Developed interactive features for complex forms and data-heavy interfaces. Collaborated on improving frontend performance and maintaining code quality.

Web Programmer (Shatel) *January 2016 - Aug 2019 (2 year 3 months)*
Built and maintained government web applications, focusing on frontend features and responsive design. Leveraged Vue.js and jQuery for legacy systems and React for modern web applications.

PROJECT HIGHLIGHTS

Contractor Management System (Freelance) *Jul 2025 – Present*

Developed a full-featured contractor management system for handling HR, payroll, contract tracking, and financial reports.
Used Next.js, React, TypeScript, Tailwind CSS, and HeroUI to build a responsive, RTL-friendly admin panel.
Enabled efficient workforce and contract management for companies working with government and private sectors.

Multi-Domain Front-End Projects (Freelance) *Jun 2025 – Present*

• Delivering end-to-end UI solutions for e-commerce, SaaS dashboards and marketing sites.

• Heavy use of Next 14, React 18, App Router, and Tailwind CSS v3.

• Rapid prototyping with HeroUI and design tokens, ensuring WCAG-AA compliance.

Construction Project & Personnel Management PanelSenior Front-End Developer – German Client *Jul 2024 – Jun 2025*

• Led the front-end of a unified admin platform that tracks project finances, HR, legal docs, profitability & risk for construction sites.

• Built a modular design-system in Next.js + HeroUI, enabling 70 % code reuse across micro-front-ends.

• Solved >85 % of legacy performance issues (Core Web Vitals all "green").

Jun 2023 Medical Partner Management System (AMP)

• React + Tailwind UI; cut order processing time by 50 % & onboarded 200 + doctors in 2 mo.

Feb 2023 Online Tire Store

• Laravel + Next.js; 4× sales increase via fast-loading, mobile-first pages.

Jan 2023 Customizable E-commerce Platform

• Next.js + GraphQL; advanced Redux state & code-splitting dropped FCP by 40 %.

Retail Business Intelligence (BI) Platform (Freelance) *June 2022*

• Spearheaded the development of a BI platform using React and Tailwind CSS for Canadian retail stores.

• Focused on optimizing user experience and performance for large datasets, with real-time data analysis.

• Integrated frontend with Laravel backend and automated data collection using Puppeteer.

Customizable E-commerce Platform (Freelance) *January 2023*

• Developed a fully customizable e-commerce platform using Next.js and GraphQL, optimizing for frontend performance and user interaction.

• Implemented advanced state management with Redux and dynamic loading, reducing page load times and improving UX.

Medical Partner Management System (AMP) (Freelance) *June 2023*

• Led frontend development for a medical partner management system, utilizing React and Tailwind CSS to create an intuitive user interface.

• Reduced order processing time by 50% and onboarded 200+ physicians within two months.

Online Tire Store (Freelance) *February 2023*

• Engineered the frontend of a highly responsive and fast online tire retail platform using Laravel and Next.js.

• Achieved a 4-fold increase in online sales through user-friendly design and fast loading pages.

Custom Website Builder (CMS) (Freelance) *January 2022*

• Developed a fully customized website builder tool using Laravel and React, enabling users to create and modify websites without technical knowledge.

• Focused on frontend scalability and modularity, which led to a 4x increase in efficiency.
