

Mohaddes Naghavi (Frontend Developer)

Date of Birth: March 3, 1994

Location: Yerevan, Armenia

Senior Frontend Developer with 7+ years of experience building modern web applications using React and Next.js. I focus on frontend architecture, performance, and creating scalable, maintainable interfaces for real-world products. I've worked with international teams and clients across Europe and the US on SaaS platforms, AI systems, and marketplaces.

Areas of Expertise

Frontend Architecture: Scalable UI systems, component-driven architecture, design systems, monorepo structures

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Vue.js

UI/UX Engineering: Tailwind CSS, SCSS, responsive design, accessibility (WCAG), RTL/LTR systems, design systems

State Management & Data: Redux, Context API, React Query (TanStack Query)

API Integration: REST, GraphQL, tRPC, WebSockets, Axios, Fetch API

Performance Engineering: Core Web Vitals optimization, code splitting, lazy loading, SSR/SSG optimization

Testing & Debugging: Jest, React Testing Library, Chrome DevTools, Lighthouse auditing

Version Control & Workflow: Git, GitHub, GitLab, Agile workflows

Tools & Ecosystem: Figma, Webpack, Vite, Babel, CI/CD pipelines

SKILLS

Frontend Development: HTML5, CSS3, JavaScript, SCSS, LESS, React, Vue.js, Bootstrap, Tailwind CSS, Next.js, Fetch API, AJAX, Axios

Frontend Tools: Figma, Sketch, Chrome DevTools, Webpack, Babel

State & Data Management: Redux, Context API, TanStack Query

Testing & Performance: Jest, React Testing Library, Lighthouse

Version Control: Git, GitHub, GitLab

APIs & Communication: REST, GraphQL, tRPC, WebSockets, Axios, Fetch API

Optimization: Code splitting, lazy loading, SEO-friendly development, accessibility (WCAG).

SOFT SKILLS

Strong leadership and ownership mindset, with experience leading frontend teams and making architectural decisions.

Excellent problem-solving skills with the ability to break down complex systems into scalable solutions.

Effective communication in distributed international teams.

Adaptable, fast learner, and detail-oriented with a strong focus on delivering high-quality user experiences.

EXPERIENCE

Senior Frontend Developer (Freelancer)

June 2025 – Present

I work as an independent frontend developer on international projects across AI platforms, SaaS products, and marketplace systems. I deliver full-cycle frontend solutions using React, Next.js, Tailwind CSS, and HeroUI, while collaborating with clients across Europe and the US. My focus is on building scalable applications that are maintainable in real-world conditions, with attention to performance and user experience rather than just shipping features quickly.

Frontend Developer (Swefti AB)

fbr 2025 – present

I worked on the frontend MVP of Sweftico, a digital marketplace for construction and property services, where I was responsible for building the initial product foundation. I designed and implemented a scalable architecture using Next.js, TypeScript, and Tailwind CSS, along with multilingual support for English and Swedish and a theme system. I also built a reusable component structure and helped shape the feature-based architecture of the application.

Frontend Developer (Aawiz)

Jun 2025 – March 2026

I developed a mobile-first PWA platform using Next.js, focusing on performance and usability across devices. I implemented authentication flows, session management, and API integrations, and built a bilingual interface supporting both English and Arabic with full RTL/LTR compatibility. The project also included offline support using service workers and significant optimization for mobile user experience.

Frontend Developer (US-based Projects)

June 2025 – Present

I have worked on multiple advanced platforms including Labelty, an AI data labeling platform, Lyratalk, a real-time communication system, and Parsigen, an AI-powered document auditing platform. Across these projects, I built scalable frontend systems using Next.js, React, and TypeScript, integrated with complex backend systems such as FastAPI, AWS services, and real-time infrastructures. I also worked within monorepo setups and CI/CD pipelines, ensuring consistency and reliability across deployments.

Senior Frontend Developer (Freelancer)

June 2025 – Present

Returned to freelancing, offering full-cycle frontend development services for diverse types of projects. Working with modern technologies such as React, Next.js, Tailwind CSS, and HeroUI, delivering performant and elegant user interfaces tailored to client needs across various domains.

Senior Frontend Developer (German Client)

June 2024 – June 2025

Worked as a Senior Frontend Developer in a company acting as an intermediary for a German construction firm. Led the development of a comprehensive project and personnel management dashboard tailored for construction projects. This platform handled all administrative, HR, legal, financial tracking, and profit/loss analysis tasks related to ongoing projects. Utilized Next.js and HeroUI to build a scalable and modern frontend architecture. Resolved a high percentage of system and business challenges by actively collaborating with cross-functional teams and improving the user experience and performance.

Senior Frontend developer (freelancer)

Mar 2023 – June 2024

Led the development of several frontend projects, including e-commerce and portfolio websites for clients globally. Used React and Next.js to create modular, maintainable components. Collaborated closely with designers and backend developers to deliver smooth, responsive, and user-friendly web experiences. Implemented modern CSS techniques (Tailwind, SCSS) to ensure consistency across devices.

Senior Frontend developer (Dornica)

Mar 2021 - Mar 2023 (2 year +)

Managed a team of frontend developers, driving the development of user interfaces for CRM and online store systems. Led the implementation of modern frontend architectures using React and component-based development. Focused on improving UI/UX and ensuring seamless integration with backend services using API consumption. Developed reusable components and optimized frontend performance, reducing load times by 30%.

Frontend developer (Dornica)

Aug 2019 - Mar 2021 (1 year 8 months)

Created responsive and mobile-friendly UI for online payment systems, profile management, and customer relationship systems. Developed interactive features for complex forms and data-heavy interfaces. Collaborated on improving frontend performance and maintaining code quality.

Web Programmer (Shatel)

January 2016 - Aug 2019 (2 year 3 months)

Built and maintained government web applications, focusing on frontend features and responsive design. Leveraged Vue.js and jQuery for legacy systems and React for modern web applications.

PROJECT HIGHLIGHTS

Labelty (US Company Project) *Aug 2025 – present*

- Developed frontend annotation interface for AI data labeling platform using Next.js 16, React 19, TypeScript, Tailwind CSS, and HeroUI.

- Built high-performance canvas-based UI for image/video annotation with scalable architecture and AWS integration.
- Focused on real-time interaction performance and modular UI system for enterprise ML workflows.

Lyratalk (US Company Project) *Jul 2025 – present*

- Contributed to real-time communication platform built on LiveKit architecture.
- Developed frontend components for live interaction, authentication flows, and session-based UI.
- Optimized real-time UX consistency and reduced latency perception in streaming interactions.

Sweftico (Swefti AB) *fbr 2025 – present*

- Developed marketplace frontend MVP for construction industry
- Built scalable, multilingual architecture with modern stack
- Focused on maintainability and production readiness

Parsigen (US Company Project) *Jun 2025 – Apr 2026*

- Built frontend dashboard for AI-powered semantic document auditing platform using Next.js 16 and Clerk authentication.
- Implemented multilingual UI and structured data visualization for RDF/SPARQL-based systems.
- Designed responsive interface for knowledge graph exploration and audit workflows.

Aawiz PWA *Jun 2025 – March 2026*

- Developed mobile-first PWA with offline support
- Implemented authentication system and RTL UI
- Built scalable structure for long-term product growth

Vega CMS (Freelance) *Jul 2025 – Apr 2026*

- Developed multilingual CMS using Vue.js and Laravel
- Implemented dynamic language system and admin panel
- Worked on full-stack features and localization logic

Contractor Management System (Freelance) *Jul 2025 – February 2026*

Developed a full-featured contractor management system for handling HR, payroll, contract tracking, and financial reports. Used Next.js, React, TypeScript, Tailwind CSS, and HeroUI to build a responsive, RTL-friendly admin panel. Enabled efficient workforce and contract management for companies working with government and private sectors.

Multi-Domain Front-End Projects (Freelance) *Jun 2025 – Oct 2025*

- Delivering end-to-end UI solutions for e-commerce, SaaS dashboards and marketing sites.
- Heavy use of Next 14, React 18, App Router, and Tailwind CSS v3.
- Rapid prototyping with HeroUI and design tokens, ensuring WCAG-AA compliance.

Construction Project & Personnel Management Panel *Senior Front-End Developer – German Client* *Jul 2024 – Jun 2025*

- Led the front-end of a unified admin platform that tracks project finances, HR, legal docs, profitability & risk for construction sites.
- Built a modular design-system in Next.js + HeroUI, enabling 70 % code reuse across micro-front-ends.
- Solved >85 % of legacy performance issues (Core Web Vitals all “green”).

Jun 2023 Medical Partner Management System (AMP)

- React + Tailwind UI; cut order processing time by 50 % & onboarded 200 + doctors in 2 mo.

Feb 2023 Online Tire Store

- Laravel + Next.js; 4x sales increase via fast-loading, mobile-first pages.

Jan 2023 Customizable E-commerce Platform

- Next.js + GraphQL; advanced Redux state & code-splitting dropped FCP by 40 %.

Retail Business Intelligence (BI) Platform (Freelance) *June 2022*

- Spearheaded the development of a BI platform using React and Tailwind CSS for Canadian retail stores.
- Focused on optimizing user experience and performance for large datasets, with real-time data analysis.
- Integrated frontend with Laravel backend and automated data collection using Puppeteer.

Customizable E-commerce Platform (Freelance) *January 2023*

- Developed a fully customizable e-commerce platform using Next.js and GraphQL, optimizing for frontend performance and user interaction.
- Implemented advanced state management with Redux and dynamic loading, reducing page load times and improving UX.

Medical Partner Management System (AMP) (Freelance) *June 2023*

- Led frontend development for a medical partner management system, utilizing React and Tailwind CSS to create an intuitive user interface.
- Reduced order processing time by 50% and onboarded 200+ physicians within two months.

Online Tire Store (Freelance) *February 2023*

- Engineered the frontend of a highly responsive and fast online tire retail platform using Laravel and Next.js.
- Achieved a 4-fold increase in online sales through user-friendly design and fast loading pages.

Custom Website Builder (CMS) (Freelance) *January 2022*

- Developed a fully customized website builder tool using Laravel and React, enabling users to create and modify websites without technical knowledge.
 - Focused on frontend scalability and modularity, which led to a 4x increase in efficiency.
